

SCAPIN

1998

Con una esperienza di 40 anni, SCAPIN ha fuso la tradizione dei vecchi maestri telaisti con le tecnologie più avanzate in termini di progettazione e di produzione. Le biciclette ed i telai SCAPIN nascono dal sofisticato sistema computerizzato Ciclocad e sono realizzati con materiali d'avanguardia, in molti casi prodotti in esclusiva per SCAPIN. Per la saldatura, SCAPIN ha adottato un sofisticato ed avanzato sistema robotizzato che garantisce una altissima ed uniforme qualità. Per la verniciatura, infine, SCAPIN utilizza tecniche avanzate di salvaguardia ambientale.

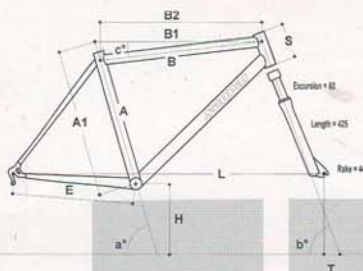

With nearly 40 years of experience, SCAPIN has united the tradition of old master frame-makers with cutting-edge technologies in terms of production and design. SCAPIN bicycles and frames are designed using the sophisticated Ciclocad system and manufactured with new age materials, in many cases produced exclusively for SCAPIN. For the welding, SCAPIN has adopted a sophisticated and advanced robotized system which guarantees constant top quality. And lastly, with the paintwork, SCAPIN utilizes advanced methods that safeguard the environment.

Mit seiner fast 40-jährigen Erfahrung hat SCAPIN die Tradition der alten Rahmenherstellungsmeister mit den höchstentwickelten Technologien im Hinblick auf Planung und Produktion verschmolzen. Die Fahrräder und Rahmen der Firma SCAPIN entstehen mit Hilfe des ausgefeilten Computersystems Ciclocad und werden aus fortschrittlichsten Materialien hergestellt, die in vielen Fällen exklusiv für SCAPIN produziert werden. Zur Verschweißung wendet SCAPIN ein hochentwickeltes und modernes Robotersystem an, das ein gleichmäßiges und ausgesprochen hohes Qualitätsniveau gewährleistet. Zur Lackierung schließlich verwendet SCAPIN fortschrittliche, den Umweltschutz berücksichtigende Techniken.
